SITUATION

Current Situation:	Gusty Santa Ana winds will continue to push fire to the west. Very high fuel loading, critically low fuel moistures, above average temperatures and single-digit relative humidities will support fire growth on the west and north sides of the Thomas Fire. Firefighters will remain engaged in structure defense operations and scout for opportunities to establish direct perimeter control. Fire will continue to threaten the communities of Santa Barbara, Carpinteria, Summerland, Montecito and surrounding areas. Fireline construction to the north of these communities will continue. Residents are urged to use caution while driving as fire equipment is still operating in the fire areas.
